

ALI MURTAZA

Faisalabad, Pakistan • +92-321-1376777 • alimurtaza.9dev@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Data Scientist & ML Engineer with hands-on experience building and deploying 10+ predictive modeling pipelines and autonomous AI applications. Proven expertise in engineering dual-model financial risk platforms (96.99% regression R^2 , 94% classification accuracy) and asynchronous agentic loops using the GitHub Copilot SDK. Expert in tabular feature engineering, hyperparameter optimization via GridSearchCV, Explainable AI (SHAP), and deploying production web systems.

TECHNICAL SKILLS

Languages & Core:	Python, SQL, C++, JavaScript (ES6+), React Native, Git, GitHub
ML & Modeling:	Scikit-learn, Random Forest, Logistic Regression, Decision Trees, K-Means, PCA, SHAP (Explainable AI), GridSearchCV, OpenCV, SciPy
Data & Analytics:	Pandas, NumPy, Feature Engineering, Outlier Detection, Data Cleaning & Preprocessing, EDA, DSA (Python)
AI & Systems:	GitHub Copilot SDK, Autonomous Agents, AsyncIO, Prompt & Context Engineering
BI & Deployment:	Power BI, Matplotlib, Seaborn, SQLite, Streamlit Cloud, Cloud Secrets Isolation

PROFESSIONAL EXPERIENCE & FELLOWSHIPS

DevelopersHub Corporation — Data Science Intern

Mar 2026 – May 2026

Faisalabad, Pakistan

- Architected and evaluated **9 end-to-end machine learning pipelines** across banking, retail, and healthcare datasets, achieving a **99/100 performance evaluation score**.
- Engineered automated data preprocessing and validation scripts in Python (Pandas/NumPy), mitigating data leakage and cutting preprocessing latency by **35%**.
- Constructed interactive **Power BI dashboards** linked to SQL queries, translating model classification outputs and predictive drivers into clear reporting for stakeholders.

McKinsey & Company — Selected Participant (McKinsey Forward Core Skills)

Starting Oct 2026

Remote Program

- Selected for a competitive global initiative focusing on structured business problem-solving, digital agility, and executive communication.
- Applying data-backed decision frameworks to translate analytical models and machine learning outputs into strategic business strategy.

NOBEL Navigators (USA) — Technical Operations Facilitator

Jun 2026 – Present

Remote

- Facilitated technical enablement workflows for international cohorts across a global social-learning platform operating in **100+ countries**.
- Organized structured public speaking and technical communication tracks, standardizing collaborative problem-solving across distributed teams.

KEY MACHINE LEARNING & AI PROJECTS

Vendor Invoice Intelligence Portal | Python, Scikit-learn, SQLite, GridSearchCV, Streamlit

[Live Demo](#)

- Engineered a dual-model predictive platform combining freight cost regression (**$R^2 = 96.99\%$**) with an invoice risk classification engine (**94% accuracy**) to automate financial auditing.
- Automated hyperparameter tuning with **GridSearchCV** across cross-validated folds, mitigating decision boundary overfitting on tabular financial records.
- Integrated an embedded **SQLite** database with a Streamlit web interface, enabling sub-second record querying and automated scoring workflows.

Career Mentor Agent | Python, GitHub Copilot SDK, AsyncIO, Streamlit Cloud, Git

[Live Demo](#)

- Architected an autonomous conversational agent utilizing asynchronous execution loops and dynamic tool routing to deliver technical roadmaps and mock interview feedback.
- Engineered persistent session state handling and context-preservation mechanics in Python, eliminating context drop-off across extended conversational turns.
- Deployed the application via Streamlit Community Cloud with secure environment variable isolation, maintaining responsive inferencing cycles.

Financial Lead Scoring & Customer Segmentation Engine | Scikit-learn, SHAP, K-Means, PCA, Pandas

[GitHub](#)

- Benchmarked Random Forest against Logistic Regression classifiers, deploying **SHAP explainability values** to identify and rank top predictive conversion drivers for financial leads.
- Constructed an unsupervised segmentation pipeline using **PCA dimensionality reduction** and **K-Means clustering**, isolating distinct customer behavioral tiers.

EDUCATION

Government College University Faisalabad (GCUF) — BS in Computer Science

2024 – Present (6th Sem)

Faisalabad, Pakistan | **Current CGPA: 3.17**

CERTIFICATIONS & HONORS

- 5x Google Career Certificates (2026):** Data Analytics, AI Essentials, AI Professional, Project Management, IT Support — *Scholarship Recipient selected by GCUF*
- Microsoft Frontier Transformation & Agent-a-Thon:** Autonomous Agent Systems (MasterClass / Microsoft)
- Fundamentals for Nobel Internship:** Nobel Certified
