PROFESSIONAL SUMMARY

Machine Learning Engineer specializing in autonomous AI agents, predictive modeling pipelines, and dual-model financial risk platforms. Proven expertise in engineering asynchronous agentic loops via the GitHub Copilot SDK, multivariate regression, and Explainable AI (SHAP). Selected for highly competitive global technical and leadership programs by McKinsey & Company, Microsoft, and the Aspire Institute (engaging directly with Harvard and MIT faculty).

TECHNICAL SKILLS

AI & Agentic Systems:	GitHub Copilot SDK, Model Context Protocol (MCP), NVIDIA NIM, Tavily, AsyncIO
Machine Learning:	Scikit-learn, Random Forest, Logistic Regression, K-Means, PCA, SHAP (Explainable AI)
Languages:	Python, SQL, C++, JavaScript (ES6+), React Native
Data & Deployment:	Pandas, NumPy, OpenCV, SQLite, Streamlit Cloud, Power BI

PROFESSIONAL EXPERIENCE

Data Science Intern | *DevelopersHub Corporation* — Mar 2026 – May 2026 | Remote

- Architected 9 end-to-end machine learning pipelines across banking, retail, and healthcare datasets, achieving a 99/100 performance evaluation score.
- Engineered automated data preprocessing scripts in Python (Pandas/NumPy), mitigating data leakage and cutting preprocessing latency by 35%.
- Constructed interactive Power BI dashboards linked to SQL queries, translating model classification outputs into clear reporting for stakeholders.

Technical Operations Facilitator | *NOBEL Navigators (USA)* — Jun 2026 – Present | Remote

- Facilitated technical enablement workflows across an international Learner-to-Leader program operating in 100+ countries.
- Mastered and subsequently led the Leadership track, standardizing collaborative problem-solving and public speaking across distributed teams.

KEY ENGINEERING PROJECTS

OmniAudit NIM (NVIDIA Global AI Hackathon) — 2026

Stack: Python, Streamlit, NVIDIA NIM, Tavily, Scikit-learn

- Engineered an autonomous financial forensics agent to detect invoice fraud, phantom shell suppliers, and price gouging.
- Architected a quantitative grounding layer using a calibrated multivariate regression model (96.99%

KEY ENGINEERING PROJECTS (CONTINUED)

Career Mentor Agent 2026

Stack: Python, GitHub Copilot SDK, AsyncIO, Streamlit Cloud

- Architected an autonomous conversational agent utilizing asynchronous execution loops and dynamic tool routing via the GitHub Copilot SDK.
- Engineered persistent session state handling in Python to eliminate context drop-off across extended conversational turns.

Fresher Juice Co. Interactive Platform 2026

Stack: HTML5, Canvas API, JavaScript (ES6+), Web Audio API

- Built a 250-frame scroll-driven canvas animation with mouse-parallax effects, a live e-commerce cart, and a Web Audio sound synthesizer.

FELLOWSHIPS & LEADERSHIP

Selected Participant (Cohort 4) | *Aspire Leaders Program* Oct 2026 – Present | Remote

- Selected from a competitive global pool for an intensive leadership track administered by the Aspire Institute (founded by Harvard University faculty).
- Engaging in live interactive masterclasses led by MIT and Harvard University faculty, focusing on responsible AI frameworks and algorithm-driven decision-making.

Microsoft Learn Student Ambassador | *Microsoft* Oct 2026 – Present | Remote

- Facilitated technical upskilling within the university ecosystem, curating and distributing Microsoft Learn collections on Generative AI and Power Automate.

Selected Participant (Forward Core Skills) | *McKinsey & Company* Oct 2026 – Dec 2026 | Remote

- Selected for a competitive global initiative focusing on structured business problem-solving, digital agility, and executive communication.

Program Contributor | *LEAD Organization* Oct 2026 | Remote

- Formally recommended by the Co-Founder for active participation, strong responsibility, and completing assigned tasks with high dedication.
- Contributed to organizational activities and online sessions focused on leadership development and empowerment.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science | *Government College University Faisalabad (GCUF)* 2024 – Present

Current CGPA: 3.14 (Currently in 6th Semester)

- **NOBEL Fundamentals Program:** Completed 90-hour international Learner-to-Leader certification.
- **5x Google Career Certified:** Data Analytics, AI Essentials, AI Professional, Project Management, IT Support.
- **Microsoft Masterclass:** Frontier Transformation & Agent-a-Thon (Autonomous Systems).
